MARKET CHALLENGE

Issues with conventional hookahs

- **Maintenance**
  Complicated cleaning and ventilation issues
- **Time**
  Lengthy setup and service process
- **Labor costs**
  Staffing and training requirements for specialist hookah service.
- **Space**
  Dedicated preparation areas required
- **Safety**
  Hot coals, smoke and elevated fire risk
- **Quality**
  Difficulty in maintaining consistent flavor experience

Consequences for business owners

- Low profit margins
- High operating costs
- Limited scalability

THE RAMSIDER SOLUTION

RAMSIDER brings together FOGRAISER devices, stations, capsules and software for a Luxury Aroma Experience.

- Mini holds 4 devices with water chambers or 8 without.
  Mini Pro holds 8-22 devices; 10 or more recommended.
  These are placement capacities, not hourly output.

- A built-in battery charging system, automatic heat-up, and capsule storage.

Ramsider Hookah Advantages

Heat-not-Burn Technology

No charcoal, ash or open flame.

Tobacco is baked. The smoke is cool.

Ready-to-Use Concept

Controlled via proprietary software integrated with the Ramsider ecosystem, requiring minimal staff involvement

Business Analytics and Customization

- Equipment status tracking
- Analysis of station and flavor popularity
- Unique customization of lighting and sound

Ramsider Advantages

FOR PARTNERS (VENUES)

Financial impact
Adds a premium service. Results depend on guest traffic, pricing and the operating model.

Audience attraction
A distinct experience for guests interested in a premium aroma ritual.

Operational efficiency
Equipment supports trained staff through controlled heating and service workflows.

Advanced technology and control
Operating controls, monitoring and analytics.

Safety and clean operation
No fire or coals; capsule technology eliminates mess

Flexibility and scalability
The founder reviews the venue and market before confirming the operating format.

Premium positioning
Enhances venue image and creates a premium-service atmosphere

Planned deployment
Built to order. Configuration and installation schedule are confirmed individually.

Ramsider Advantages

FOR CUSTOMERS

Pure and rich flavor
Three controlled heating zones bake the blend without charcoal or an open flame.

Stability and control
Repeatable heating programs with water level and temperature monitoring.

Hygiene and care
Follow the service and cleaning instructions for each device and station.

Choice of blends
Capsules based on tobacco leaf, tea leaf or herbs. Check the selected blend.

Speed and convenience
UNO heats up in 6 minutes.
Control basic operation on the touchscreen.

Contemporary design
Minimalist style with interactive screen and lighting

Wide flavor assortment
Localized selection based on regional characteristics and preferences

Heating mode selection
Laboratory selection of the optimal heating mode to unlock flavor potential

PRODUCT RANGE
B2B Monetization Channels

Hookah stations
Mini and Mini Pro stations for hospitality.
Placement capacity depends on configuration.

Capsules
Blends based on tobacco leaf, tea leaf or herbs,
with programs matched to the selected blend.

Modern software
Digital platform for device management and process optimization, enhancing operational efficiency and visitor comfort

Accessories
Premium add-ons and functional solutions for customization and improving the hookah experience in venues
